1. Any active member may propose a revision to the constitution.
2. Revisions shall be ratified by a three fifths majority of officers.

ARTICLE 9 NON-DISCRIMINATION CLAUSE

1. Oregon State University Security Club does not discriminate on the basis of: age, color, disability, gender identity, or expression, genetic information, marital status, national origin, race, religion, sex, sexual orientation, or veteran status.

ARTICLE 10 INTERACTIONS WITHIN THE CLUB

1. This code of conduct applies to all spaces managed by OSUSEC. This includes online chat, mailing lists, in-person meetings, and any other space where OSUSEC members can communicate. It applies to all of your communication and conduct in these spaces, including emails, chats, things you say, slides, videos, posters, signs, profile pictures, or even clothing displayed in these spaces. In addition, violations of this code outside these spaces may, in rare cases, affect a person's ability to participate within them, when the conduct amounts to an egregious violation of this code.
2. This isn't an exhaustive list of things that you can't do. Rather, take it in the spirit in which it's intended - a guide to make it easier to communicate and participate in the community.
 - 2.1. Be friendly and patient.
 - 2.2. Be welcoming. We strive to be a community that welcomes and supports people of all backgrounds and identities. This includes, but is not limited to, members of any race, ethnicity, culture, national origin, color, immigration status, social and economic class, educational level, sex, sexual orientation, gender identity and expression, age, size, family status, political belief, religion or lack thereof, and mental and physical ability.
 - 2.3. Be considerate. Your work will be used by other people, and you in turn will depend on the work of others. Any decision you take will affect users and colleagues, and you should take those consequences into account. Remember that we're a world-wide community, so you might not be communicating in someone else's primary language.
 - 2.4. Be respectful. Not all of us will agree all the time, but disagreement is no excuse for disrespect. We might all experience some frustration now and then, but we cannot allow that frustration to turn into a personal attack. It's important to remember that a community where people feel uncomfortable or threatened is not a productive one. Members of the OSUSEC community should be respectful when dealing with other members, as well as with people outside the OSUSEC community.

- 2.5. Be careful in the words that you choose and be kind to others. Do not insult or put down other participants. Harassment and other exclusionary behavior aren't acceptable. This includes, but is not limited to:
 - 2.5.1. Violent threats or language directed against another person.
 - 2.5.2. Discriminatory jokes and language.
 - 2.5.3. Posting sexually explicit or violent material.
 - 2.5.4. Posting (or threatening to post) other people's personally identifying information ("doxing").
 - 2.5.5. Personal insults
 - 2.5.6. Unwelcome sexual attention.
 - 2.5.7. Advocating for, or encouraging, any of the above behavior.
- 2.6. When we disagree, try to understand why. Disagreements, both social and technical, happen all the time and OSUSEC is no exception. It is important that we resolve disagreements and differing views constructively. Remember that we're different. The strength of OSUSEC comes from its varied community, people from a wide range of backgrounds. Different people have different perspectives on issues. Being unable to understand why someone holds a viewpoint doesn't mean that they're wrong. Don't forget that it is human to err and blaming each other doesn't get us anywhere. Instead, focus on helping to resolve issues and learning from mistakes.

ARTICLE 11 CODE OF ETHICS

1. An Adaptation of Codes of Ethics (IEEE, CEH, SANS), prepared by Corey McMahon, 2009 – 2010 ISAC CCDC Chairman. Modified by Daniel Reichert for use by the Oregon State University Security Club.
 - 1.1. Ensure the confidentiality of any private information obtained through day-to-day activities.
 - 1.2. Respect the degree of privacy expected by the fellow citizens and not pursue or examine students' information including data, files, records, or network traffic except as defined by the appointed roles, and/or without the permission of the end user." Unless given specific authorization by the proper authorities.
 - 1.3. "Obtain [specific and detailed] permission before probing systems on a network for vulnerabilities"
 - 1.4. "Ensure all penetration testing activities are authorized and within legal limits."
